#### Questions:

I like using GitHub pages because I can update the page by pushing my changes instead of reuploading new files. I like using cPanel hosting because the site tools offer a lot of options but are still relatively easy to understand and use.

The most satisfying part of this assignment was refreshing the page and seeing things look as I expected.

#### Questions:

1. I like using GitHub pages because I can update the page by pushing my changes instead of reuploading new files. I like using cPanel hosting because the site tools offer a lot of options but are still relatively easy to understand and use.
2. The most satisfying part of this assignment was refreshing the page and seeing things look as I expected.
